

MILWAUKEE M12 LED Lantern light - skin

Part Number: M12LL-0

Specification

MILWAUKEE M12 LED Lantern light - skin
The M12 LED Lantern/Flood Light features a 180-360 adjustable beam design to allow users to select between area lighting and task lighting for maximum versatility. With over 400 Lumens, the new unit delivers unmatched light output to illuminate large work areas. As an added value to the user, the light also includes a high power 2.1A USB port to charge tablets, smart phones, mp3 players and other electronic devices. With a rugged design and impact resistant lens, the new light is built to withstand abusive job site conditions. TRUEVIEW High Definition Lighting utilises the most advanced lighting technology to deliver true representation of colors, optimised color temperature, and even beam patterns all designed to improve productivity and safety
